Software engineer passionate about building beautiful, intuitive digital experiences. Leveraging full stack development skills to create impactful, user-focused solutions.

EXPERIENCE

SRS Web Solutions • Software Engineer August 2024 - Present

Contributed to cross-platform web and mobile development using React, React Native, Node.js, and Express.js. Delivered reusable components, secure offline-ready features, and backend services for form handling and API integrations. Collaborated closely with product and design teams to ship performant, accessible solutions.

PROJECTS

Bill: Easy Bill-Splitting with Friends

A beautiful iOS application that allows the user to take or upload a photo of their bill to quickly calculate tips, select their items, and add friends in order to easily send and receive payments.

Utilized: React Native, Typescript, Expo, Supabase, Openrouter, RevenueCat

Objects ML & AI

iOS application with real-time object detection and classification using SSD Mobilenet and Gemini's image AI. The model is trained on a custom dataset for around 80 common objects, and then used to detect and classify objects in real-time. Take a photo to determine all objects in the scene, provide general pricing as well as relevant links to purchase!

Utilized: React Native, Typescript, Tensorflow, Openrouter, SSD Mobilenet

Focus: Premium Camera Hardware

A high-end photography gear store built on the MERN stack, featuring product filtering, reviews, ratings, user accounts with order tracking, admin controls, and PayPal integration.

Utilized: React, JavaScript, HTML, Tailwind CSS, Mongoose, Express.js, Node.js, Vite, GitHub, Vercel, Render, MongoDB Atlas

Paper

A full-stack social media application where users share content, engage in discussions, and vote on posts. Featuring authentication, votes, commenting, and more, integrated with a backend service.

Utilized: Next.js, Tailwind CSS, Supabase, GitHub, Vercel, React, JavaScript, HTML, CSS
